DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claims 1-20 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims as filed are confusing, vague and indefinite for the following types of problems:

the semi-colon after the term “comprising” leaves no object;

“a at least one of fastener” is not a grammatical thought, nor is “pair electrical connection wires”;

“of component b)” is indefinite as b) defines no component, only wires;

“all” is not understood in context;

limitations to the “assembled rod” remove the claim from the subject of a carrier assembly to the combination of a carrier assembly and rod;

limitations to the “sun visor center support” remove the claim from the subject of a carrier assembly to the combination of a carrier assembly and rod and center support;

Claim 7 defines the combination of carrier and visor body and does not limit the subject matter of claim 1 and is therefore rejected as confusing under this statute as well as under 35 USC 112, fourth paragraph.

Claim 11, section e) is confusing for interjecting the last phrase without any frame of reference to other structure.

Note that a comma should follow “visor rod” in claim 1, line 8, and claim 11, line 8.

Drawings

3. The drawings are objected to under 37 CFR 1.83(a). The drawings must show every feature of the invention specified in the claims. Therefore, the flat faces aligned, claim 11 must be shown or the feature(s) canceled from the claim(s). No new matter should be entered.

Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as “amended.” If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either “Replacement Sheet” or “New Sheet” pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Allowable Subject Matter

4. Claims 1-20 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. All show visors with electrical connection.
